

Biovit-i

Ascorbic Acid, Vitamin E, Vitamin C, Lutein,
Zinc & Copper Eye Vitamin Capsule

Presentation

Biovit-i Capsule: Each capsule contains Ascorbic Acid USP 60 mg, Vitamin E USP 30 mg, Zinc BP 15 mg, Lutein Ph. grade 6 mg, Copper Ph. grade 2 mg.

Description

Biovit-i Capsule is a special preparation of Vitamin E, Vitamin C, Lutein, Zinc & Copper.

Composition

Each **Biovit-i** capsule contains:

Vitamin-C (as Ascorbic Acid BP) 60 mg. Vitamin-E (as Alpha Tocopheryl Acetate USP) 30 mg. Zinc (as Zinc oxide BP) 15 mg. Lutein Ph. Grade 6 mg. Copper (as Cupric oxide Ph. Grade) 2 mg

Indications and Uses

Primary use: Eye health, Age-related eye disease; Secondary uses: Antioxidant, Immune system support. This is an advanced new antioxidant supplement formulated to provide nutritional support for the eye.

Pharmacology

The formulation contains essential antioxidant vitamins, minerals and lutein. Vitamin C is highly concentrated in the lens compared to blood. Long term use of Vitamin C supplement (10+ years) has been associated with reduced risk of cataract. It has important role in harmful free radicals scavenge activity.

In study, it is found that high serum vitamin E concentrations have been associated with reduced risk of cataract (exact mechanism of action is not still established).

Lutein is a carotenoid specially concentrated in macula. Clinical and animal data indicates that this carotenoid could protect the macula from oxidative or light damage. Although mechanism of action is not clear but one large study has found that high levels of dietary lutein are associated with relatively lower risk of AMD (Age-related Macular Degeneration: a condition where fine visual activity is lost) and cataract.

Zinc is an essential trace element involved in many enzyme systems. Symptoms of less severe deficiency include distorted or absent perception of taste, smell and poor wound healing. Severe deficiency causes skin lesion, alopecia, diarrhea, increased susceptibility to infection and failure to thrive in children.

Copper plays an important role in growth, skeletal integrity and development of nervous system. As a part of various enzymes, it takes part of numerous metabolic conversions.

Dosage and Administration

One capsule daily. In more severe cases, 2 capsules a day may be required or as directed by the physician.

Contraindications

This product is contraindicated in patients with known hypersensitivity to any of the ingredients.

Precautions

Caution should be taken during the concomitant use of anticoagulant.

Side Effects

Generally well tolerated. However, a few allergic reactions may be seen. Diarrhea and other gastrointestinal disturbances may occur.

Use in Pregnancy & Lactation

Recommended.

Drug Interactions

No such drug interactions have been reported.

Overdosage

No data found.

Pharmaceutical Precautions

Store in a dry & cool place below 25°C. Protect from light.

Commercial Pack

Biovit-i Capsule: Each box contains 5 x 6's Capsules in Alu-Alu blister strips.
